

The College of Law and Business (Israel) and the University of Kassel (Germany) invite you to participate in an international zoom seminar on

Blockchain: Law, Business and Economics

March 8th – March 18th, 2021

Blockchain and Distributed Ledgers are not only the underlying technologies of cryptocurrencies like Bitcoin and Ethereum, but also enable many other uses that depend on immutable information and executable code - 'smart contracts. The seminar provides a profound understanding of the economic incentives and the legal structures underlying blockchain applications in business and in law. Academic classes include lectures given by practitioners from the blockchain industry, from law firms, and from government institutions currently engaged with applying blockchain technology.

Selected Topics

How Blockchains work | Cryptocurrencies | Regulating Blockchain Smart Contracts |
Incentive Structures | Securities and Monetary Regulations | Security Tokens |
Entrepreneurship in Israel | Virtual Tours of Israel

Applications from students of the Law School of the University of Padua including a CV and a short letter explaining your interest in the program - may be submitted until January, 31st
